Contents

Ambrosio L: Transport equation and Cauchy problem for BV vector fields 227

Anderson M, Katsuda A, Kurylev Y, Lassas M, Taylor M: Boundary regularity for the Ricci equation, geometric convergence, and Gel'fand's inverse boundary problem 261

Bonatti C, Crovisier S: Récurrence et généricité 33

Butler LT: Toda lattices and positive-entropy integrable systems 515

Carlson JF, Thévenaz J: The classification of endo-trivial modules 389

Crovisier S → Bonatti C

Farrell FT, Ontaneda P: Harmonic cellular maps which are not diffeomorphisms 497

Gindikin S, Krötz B, Ólafsson G: Holomorphic H-spherical distribution vectors in principal series representations 643

Gindikin S, Krötz B, Ólafsson G: Holomorphic H-spherical distribution vectors in principal series representations (Erratum) 683

Hanamura M: Mixed motives and algebraic cycles II 105

Katsuda A → Anderson M

Kenig CE, Ponce G, Vega L: The Cauchy problem for quasi-linear Schrödinger equations 343

Kerov S, Olshanski G, Vershik A: Harmonic analysis on the infinite symmetric group 551

Kostant B: Powers of the Euler product and commutative subalgebras of a complex simple Lie algebra 181

Krötz B → Gindikin S

Kurylev Y → Anderson M

Lassas M → Anderson M

Meeks III WH, Pérez J, Ros A: The geometry of minimal surfaces of finite genus II; nonexistence of one limit end examples 323

Mok N: Extremal bounded holomorphic functions and an embedding theorem for arithmetic varieties of rank ≥ 2 1

Nivoche S: Proof of a conjecture of Zahariuta concerning a problem of Kolmogorov on the ϵ-entropy 413

Nivoche S: Proof of a conjecture of Zahariuta concerning a problem of Kolmogorov on the ϵ-entropy (Erratum) 451

Ólafsson G → Gindikin S

Olshanski G → Kerov S

Ontaneda P → Farrell FT

Pérez J → Meeks III WH

Ponce G → Kenig CE

Ros A → Meeks III WH

Szenes A, Vergne M: Toric reduction and a conjecture of Batyrev and Materov 453

Taylor M → Anderson M

Thévenaz J → Carlson JF

Vega L → Kenig CE

Vergne M → Szenes A

Vershik A → Kerov S
